# Big Business and Politics

It is a tough when D. M. Dugan, the leader of the Tory Party in Alberta, is starting talking about saving the taxpayers' money on a tie-election. When did he have a change of heart? Mr. Dugan as all know is a bond broker and has the outlook of such towards the tax-paying public. I have borrowed a few copies of the Alberta public accounts to look up the records of his dealings with the government of Alberta, and can now say why he could never lead an opposition. A representative of the people cannot serve the people and edit. Here is what the government books show that he and his company were paid for his Alberta bond dealings:

1926, paid D. M. Dugan	Investments Ltd., \$446,706.42
1928, paid D. M. Dugan	Investments Ltd., 2,023,767.35
1929, paid D. M. Dugan	Investments Ltd., \$1,076,769.08
1930, paid D. M. Dugan	Investments Ltd., \$2,741,834.43
1931, paid D. M. Dugan	Investments Ltd., \$1,831,767.35
1932, paid D. M. Dugan	Investments Ltd., \$792,334.92

I am sorry that I could not borrow any more of the public accounts, because this is not the complete story. I did go down to the parliament buildings to obtain copies of the accounts for the other years, but to do behind the C.C.F. government now charges a person three dollars for each yearly statement, showing how it has been doing our own business for us. Well, I did not have the money on me, and at first I was mad, but soon I began to laugh, (at myself, because I have voted twice for John Lymburn, our attorney general—but no more, thank you!) Did ever anyone before hear of a servant saying, "I will let you see how I did your business last year if you give me three dollars in currency, not in Social Credit." It serves me right for voting for Lymburn. It would be strange indeed, if Mr. Dugan and Premier R. G. Reid were not real friendly after having transacted \$10,000,000 worth of business. Mr. Dugan would quite naturally prefer the present C.C.F.-U.F.A. government, even if the customer that it should be defeated. I am not bright, but I now have a sneaking suspicion, and I believe it is shared by a few others, that Mr. D. M. Dugan should not lead any party and should not even be selected as a representative. I do not wish to be unkind, but I do think he has had tens of thousands of good and sufficient reasons (which would be of immediate assistance to our unemployed) for giving the Alberta government the breaks during the past year. No, I for one cannot take Mr. Dugan very seriously when he cries on behalf of the taxpayers to avoid a tie-election. We should have a general election and Mr. Dugan should go the same road that the Reid government will go.

## A HEAVY TAXPAYER

### NORTH SLAYER LOSTS APPEAL

Edmonton—John Ferguson, 26, who was found guilty by supreme court jury of murdering his sweetheart's father, Louis John, at Prairie Lake, near High Prairie, March 15 last, will be hanged on October 6th, the Alberta Appeal Court on Thursday dismissing the appeal against the sentence.

# CALGARY RATEPAYERS CALL A HALT

Calgary—Proposals to spend \$180,000 on the construction of two outdoor swimming pools, a school auditorium and gymnasium and "under-take repairs to the town-hall building" went down to defeat when city property owners voted on the money bylaws yesterday.

## NEW LICENSE ISSUER

The office of issuer of Auto licenses, made vacant by the death of Wilson Litton, and which, pending the appointment of a successor, has been, at the request of the department, carried on at The Western Globe's office, has been awarded to Jesse Fraser. In future car licenses may be obtained at the office of Fraser-MacDonald Agency.

## DELSURNE PIONEER DEAD

Delburne, Sept. 26.—The death occurred at Delburne on Saturday last after a lingering illness of Oris E. Stevens, old-timer of Betsker and Delburne.

## SHIPS LOG SHOWS LAST ORDER BAD

New York, Sept. 19.—The final order from the bridge of the burning liner *Merry* came to the engine room would have left the ship turning crazily in circles. It was added today at a federal enquiry into the disaster.

The log of William W. Trippe, chief engineer on the *Merry*, was read before the U.S. department of commerce board headed by Dickerson N. Hoover, and it showed the last order telegraphed from the bridge called for:

"Full speed ahead on the starboard engine, full speed astern on the port engine."

## PROCESSED CATTLE MARKET GLUTTED

Regina—E. J. G. Daggar, minister of agriculture, is in receipt of telegram from the Manitoba deputy minister of agriculture, which declares meat from processed cattle was "backing up" and packing firms were unable to sell the product by reason of the Federal order which prevents any sale within Canada or the United Kingdom.

Mr. Daggar has wired Hon. Robert Weir, Federal minister of agriculture, asking him that the prohibitive order be changed or the Federal government arrange to guarantee the trade against loss.

## SAFEGUARD CHANGES MANAGER

His many friends in Lacombe will hear with regret that Mr. Chilmann, who has been manager of Safeway stores here for the past few months has been removed from his position, and with his family will leave Lacombe this week. While here Mr. and Mrs. Chilmann have made many friends, who are sorry to see them leave. His place in the store is filled by Robert Sanders, who has been connected with the Red Deer branch the institution.

# Blackfalds to Vote Oct. 10

## TO THE VOTERS OF THE VILLAGE OF BLACKFALDS

To the Editor: With regard to the Local Option vote to be held here on Wednesday, October 10th, a few points should be considered by all those who are entitled to vote.

First of all, we wish to point out that by casting your vote in favor of Local Option, you will deprive a large family of its living. In times like these with work hard to obtain it is certain that by taking away the license from the Blackfalds hotel you would be doing a great wrong to this family.

The Blackfalds hotel has always been run in an honest and creditable manner and Chas. Moir, the proprietor, who is a returned war veteran is well liked and admired by everyone who has ever stopped at his place. The hotel, is undoubtedly an asset to the village, and without it, there would be no accommodation whatsoever for the travelling public.

When you go to the poll on Wednesday, October 10th, it will be well to give the matter in question the most serious thought. Remember that by casting a local option vote you will be helping to deprive a father, mother and a large family of a living. A vote to maintain present conditions will help to retain this living for this family. Also, when you go to the polls, just place yourself in the position of this family. Suppose you were in a like circumstance with every thing you have involved, you would appreciate it if support were given your cause. Remember, you can either help or harm this family by your vote. It is entirely up to you. Can you see any reason why this family should be deprived of a livelihood? What reason can you have for voting in favor of Local Option?

Local Option has never proven a success anywhere it has been tried. It simply leaves the way open for the bootlegger, and during the days of prohibition that was surely proved to be a curse. Remember also that aside from the bootlegger, other trades within a ten minute drive of Blackfalds have licensed hotels. Local Option would therefore deprive business places of Blackfalds of business they are entitled to by patrons of the village visiting other towns.

Another point that deserves a lot of consideration from the voter, is that Mr. Moir spent several years overseas fighting in the Great War. Voters of Blackfalds, a man who has spent several years of his life fighting in defence of his country, deserves appreciation and not condemnation.

It is to be hoped that the voters of Blackfalds will go to polls on Wednesday, October 10th, with an open mind, and not biased by the petty spite of others. Keep in mind the fact that the welfare of one of your own neighbors is at stake, and vote against Local Option. Show the world that Blackfalds is always ready to assist its own citizens and the village.

Seward, Kas.—George Schmidt, who has retired as president of the Seward State Bank, believes he has a record few bankers can equal. In 35 years as a banker he never foreclosed a mortgage on a farmer, and never lost a cent by trusting one.

# AMERICAN YACHT RETAINS CUP

From the country of "long counts" in boxing, "false starts" in motorboat racing, "rule-waiting" in yachting, comes the word that once more the American yacht has retained "The America's Cup". Although Vanderbilt keeps the cup, the action of the trustees and judges of the New York Yacht Club in disallowing Sopwith's legitimate protest, leaves a "nasty taste" in the mouths of all sportsmen.

Starting off with the most amiable of feelings on both sides, the deliberate fouling of the British challenger by Vanderbilt upset all that and in its stead placed Vanderbilt in the minds of many as a "cheap trickster". The sporting code across the line seems to be "win fair or foul—but no matter how—win". It would only be fair and just, if in the future British sportsmen refuse to race in any race or take part in any competitive sport across the line. Experience should by now have taught them that the cards are always "stacked" against an outsider. The best boat did not win. The best boat could not win there.

## LUMP AMOUNTS FOR RELIEF USE

Edmonton will receive a lump sum of \$17,500 per month for relief today. Calgary will receive \$61,600 a month. The payment in Calgary is large because that city has 2,000 more individuals on relief than Edmonton.

Lump sums will be paid to the cities by the Alberta government in the way of monthly contributions for relief purposes, covering a period of eight months from Sept. 1. The payments are to be made will include both provincial and federal government aid under the new scheme recently agreed upon at Ottawa.

## WANT 10 CENTS FOR EACH POUND GAINED

The members of the Central Alberta Livestock Producers' association have decided that they should have ten cents per pound for each pound of gain put on cattle fed under the rancher-farmer livestock feeding policy.

With feed grain at approximately one cent per pound and the price of roughage in proportion, it needs a certain amount of assurance that some returns will be made or no cattle will be fed.

Approximately seven pounds of grain are required for each pound of gain on a steer and with grain at one cent per pound, it can readily be seen that the feeders are not making an unreasonable request.

At the time of writing, a feeder steer is not worth more than five cents per pound, making a 700-pound steer worth \$35. A 300 pound gain may bring this steer into the finished class when he would sell for more per pound. If he were fortunate enough to bring five cents a pound, which is quite within the realm of possibility, he would be worth \$50. Three hundred pounds of gain at 10 cents would give the feeder \$30 for his feed and would return the owner \$10 for an animal that was worth \$14 when it went into the feed lot.

## CHEVROLET TRUCK FOR SALE

1929 1 1/2 ton Truck for sale. Good tires; motor good. \$200.00. J. W. Simons, Alx.

# Lindberg Case New Solved

New York—Police announced Thursday they have in custody the man who received the \$50,000 ransom money paid by Col. Charles A. Lindbergh in an intellectual effort to recover his kidnapped son two years ago. The man is Bernard Richard Hauptmann of the Bronx, a thorough of the City of New York.

## Authorities recovered \$13,750 of the ransom money.

The announcement said the man is an alien and came to the United States as a stowaway 11 years ago. The brief police announcement contained no further details. But the air at the Greenwich St. police station, where the announcement was made, was surcharged with rumors.

Dr. John F. Condon, the "Jastie" secretary of the Lindberghs previously had been taken to police headquarters.

"We have in custody the man who received the ransom money. He is Bernard Richard Hauptmann, 3279 East 25 St., the Bronx. He is an alien who came to this country as a stowaway 11 years ago."

One of the reports, unconfirmed, said Hauptmann a short time ago paid for some gasoline at a Bronx filling station with banned money. The operator became suspicious at the use of the banned money and notified the police. The report said the man had an automobile which was found to have been stolen in New Jersey, near Lakewood, the night before the Lindbergh baby was kidnapped March 1, 1932.

## MORE LIBERAL IDEAS IN DRESS

There is room for debate as to which has the greater influence, fashion or science. The professor of medicine and hygiene generally, with the assistance of newspaper and other publicity, have convinced the world that there is virtue in sunlight. It is now commonly known that the exposure of the body to sunshine is good for health. Fashion has followed on the heels of science by designing bathing suits that expose the maximum area of the body to light.

Thus does knowledge and common sense release humanity from the shackles of silly restrictions. The old idea that something damaging to morals occurred if more than a few square inches of the human body was exposed to view has departed, and nobody seems to be morally any less because of it. It is a better morality and cleaner mind has taken the place of the old prudery.

In the cloak cities people go all over the place in their bathing suits, and nobody pays any particular attention to whether it is a better morality and cleaner mind has taken the place of the old prudery. This is a sign of the times, a sign that ideas are changing. The next natural development should be that of a more sensible style of summer-time attire for men. Some ancient notions still decree that men shall continue to smother in smothering clothing when the thermometer reads somewhere around the nineties. This is foolish and entirely without reason. However progress has begun, and no doubt in a few years we will see men constantly clothed during the summer in scanty attire more suitable for both their health and comfort.

## WHEAT POOLS

The three prairie Wheat Pools will co-operate in presenting a series of 13 radio talks during the fall months, the first to be given on October 28th when Louis Brulle, president of Saskatchewan Wheat Pool will be the speaker. These talks will be given on Wednesday evenings from 8:15 to 8:30 Mountain Time, the Alberta stations being C.J.C.A., Edmonton Journal and C.P.O.N., Voice of the Prairie, Calgary.

## THE ALBERTA WHEAT POOL

The Alberta Wheat Pool announces that commencing October 1st wheat placed in the 1934-35 Pool will receive an initial payment based on No. 1 Northern, Vancouver, of 60c, a bushel. The pooling of wheat of course is entirely connected with the elevator. Those desirous of placing wheat in this Pool should see the Pool Elevator Agent.

## NEW ROAD CONTRACTS

Tenders have been called for highway construction work for the following sections of main highways, which includes the grading of these roads: Hardisty to Hughenden, 19 miles; Coronation to Vesper, 17 miles; Irma to Wainwright, 18 miles; Edmonton to Okotoks, 25 miles; Granger via Carleton to Junction No. 5 highway, 16 miles; Olds-Burnside highway from Dog Pound Creek to Sundre, 13 miles. This is in addition to contracts already awarded for highway work in other parts of the province.

# Interesting Rimbey Items

Mr. Kenneth Donnelly who has been returned to Edmonton on Sunday, Mr. Donnelly expects to enroll at the U. of A. where he will continue his course in dentistry.

The Male Quartette from the Northern Bible College at Red Deer gave an excellent performance at the Sunday evening service at the Church of the Nazarene.

Mr. Harvey Brooks of the Lacombe district has been in Rimbey during last week, left on Saturday and will take the Northern Bible College at Red Deer when it opens on September 25th.

A brave mother spent two days travelling through wet and snow, with one horse hitched to a two wheeled gig in order to bring her five small children to warmth and food. The family have been living on land away out west beyond municipal boundaries, close to the Saskatchewan River. The father is unable to work and as long as the vegetables in the garden lasted the mother fed the children. With the early hard frost of last week their potatoes froze in the ground and the family was left destitute. When they arrived in Rimbey, six of them packed into the tiny box with an old blanket, the children had no clothes other than those made from flour and gunny sacks. Const. Forthman took them in charge, and then suitably clothed and they will be taken to Edmonton today (Monday) and placed as wards of the Neglected Children's department. There are four boys and a girl ranging in ages from 10 to 3 years. The children having been spending the intervening time at the Cottage Hotel and Mr. Taylor says that they are as happy as can be, now, with their new clothes and plenty to eat and the prospect of a trip to Edmonton.

Measles, A. B. MacDonald, J. W. Cooke, and Chas. Jackson drove to Edmonton on Friday, returning on Sunday.

The roads are in terrible condition now with the continued rain and snow. The newly graded portions of the main highway are almost impassable and it is to be hoped that the communication from highway commissioner Davidson to the Blindman M.D. of last week will lead to some material development. The people of Rimbey and district are tired of having the best consideration in the province from the government. Close to \$7,000.00 were paid out of Rimbey and district for automobile license and what have you?

Grain is reported as moulding in some directions from here. Germination which had begun during the warm showers has been checked by the frost. The loss is short and farmers are disposing of their stock. The berry crop was ruined by frosts early in the season and potatoes will sell at a premium before spring. The present price is around a dollar per bushel.

## POULTRY MARKETING BOARD

Establishment, at the request of the Alberta Poultry Growers' Association of a provincial poultry board, to direct attention to marketing of the product was announced by Hon. P. S. Grisdale, minister of agriculture.

The board, which will function under the administration of the minister, consists of the following members: T. A. Brail, farmer; R. B. Johnson, Rainer, farmer; P. J. Higginson, Millet, farmer-turkey raiser; J. W. Howford, Edmonton, farmer; C. M. Baker, Calgary, wholesale merchant and poultryman; J. McK. Hughes, Flatbush, farmer; C. O. Pool, Beaverlodge, farmer; J. H. Rhodes, Brant, farmer; Charles Murdoch, Lacombe, farmer; Thomas Wright, Iron Springs, farmer.

## SCHOOL EXPLOSION TAKES ONE LIFE

Widewater, Sept. 24.—One man who fatally burned and two children were injured when an oil can exploded while the stove at Lipsett school was being lighted Thursday.

P. Insurrection, who was lighting the fire, used a can of gasoline in mistake for kerosene, had his clothing burned off and suffered serious burns about the stomach, chest, face and hands. He died Friday. Willie Tait was burned about the face and back.

Widewater is on Lemna Slave Lake, 150 miles north of Edmonton and 90 miles east of High Prairie.

# Boxing Bout at Ponoka

Fight fans are due for a big treat next Tuesday, Oct. 2nd, at Ponoka, when some of the leading Lacs and Welterweights of the Province will tangle for championship honors. Pete Holm is "promoting" this big boxing card and "The" needs no introduction to fight fans of the province. Every one of the last few champions by Pete for this bout is a real-tough in his class and weight and, every match on the card will be a good one. Pete Holm will fight on the card himself against Gordon Williams, of Edmonton in the main bout, which is scheduled for 10 2-minute rounds. Gordon Williams and Pete have met each other before and battled to a draw. Williams is in excellent form for this bout, and Pete Holm was never in better condition. Being a welter-weight bout, this main event should show a lot of fast action. The semi-main event will be between Don Wells of Red Deer and Johnny Smith, of Edmonton. Don Wells has been seen in action many times by local fans, and is a general favorite. Johnny Smith is hailed as a comer and is as fast as they make 'em. This should be a great exhibition of speed and is scheduled to go 6 2-minute rounds. Tyler McLean and Sidney Walsh, two great fighters will meet in the second preliminary and should put up a good bout. These two pugilists, although comparative strangers to fans here, come to Ponoka highly recommended. Ted Olson and Hastings Howe, two 120 pounders open their big card, and if it speed you want, these little fellows have plenty of that. This is a real card, fans, and should be well worth seeing. Admission charges are most reasonable: \$1.00 for "Ring-side" and \$5.00 for "Boxing" seats. A big dance afterwards with 120 Paulsen and his dance band in attendance.

Fight fans of Lacombe and Central Alberta will be glad to know that Clive Smith, now training in Seattle, Wash., had his first professional bout on September 14. Clive stopped his opponent in the second round. It is reported that Clive had his man completely subdued in the second round and the fight was stopped by the referee to save his opponent further punishment.

## CLIVE SCHOOL FAIR

Clive, Sept. 22.—Annual school fair was held in Clive community hall under more favorable weather conditions than have prevailed for over a week. In all 14 schools competed from the surrounding countryside and also the village. The following were the judges: Mary Smith for the department, Cookery and needlework, Miss Rogers, of Holden; vegetables and handicraft, Mr. Holton; Oils; livestock and poultry, Mr. M. Maydon, and all branches of school work and art, Mr. W. J. McLean, school inspector. A heavy entry list in writing, composition, art and map drawing, was a feature, as was also the cooking section, which had a very heavy entry list in cakes and pies, and a smaller list in cookies.

REDUCING MADE HER  
LOOK YOUNGER

## A Burden Of Fat Gone

Here is another case where the firm figure of youth has displaced the coarse, fat outline of middle age. It is a housekeeper writing she says:

"I cannot say what weight I was, but I was very fat—a burden to myself. I have taken three bottles of Kruschen Salts, and now I am quite slender. I am over 56, and people take me for 40. I am more than proud of myself. You can take it from me that every word of this is true. I took a teaspoonful in hot water every morning till I used three bottles. Now I only take half a teaspoonful each morning. I cannot recommend the Kruschen Salts enough, for they are worth their weight in gold."

Mrs. A. H. Kruschen Salts contain the cause of fat by assisting the internal organs to perform their functions properly—to throw off each day the waste products and poisons which, if allowed to accumulate, will be converted by the body's chemistry into fatty tissue.

## OCCASIONAL WIFE

By EDNA ROSA WEBSTER  
Author of "Joretta," "Lipstick Girl," etc.

## SYNOPSIS

Camilla Hoyt and Peter Anson, young and in love, marry secretly, deciding to live their own lives apart until Peter is able to provide for her. Peter is a young, struggling sculptor trying to win a competition for a scholarship abroad and Camilla is the adopted daughter of a wealthy family. She is sent to inherit money when she comes of age and is studying commercial art in the hope of landing an agency job. Others in the story are Avis Werth, another wealthy girl who is trying to win Peter; Sylvia Todd, Peter's model and Gus Matson, his former roommate with whom he has quarrelled. After a party at an exclusive club when the rest of the members of the party go to a cabaret to continue the party, Peter and Camilla slip off to the beach by themselves and fall asleep on the sand. When they awake it is early morning and Avis and another boy are standing near them. This makes it impossible for Camilla to announce before the party that she and Peter are married. Camilla urges Peter to accept some of her earnings to help him along, but Peter refuses and they quarrel. After Camilla has gone from the studio, Avis Werth calls and persuades Peter to accept an loan of \$10,000. Peter finishes his exhibit and asks Avis and Camilla for suggestions as to a name for it. Camilla suggests "Eager Youth," and Avis "Inspiration." Peter adopts the latter. Camilla, heartily, goes to Peter's studio for quiet and to think. Peter and Avis follow her later, and the lights are turned on, see the statue has been shattered to pieces. Avis accuses Camilla of doing this, and Camilla, stunned by the disaster, and hurt and horrified by the accusation, faints.

At Camilla's suggestion, Peter enters as his exhibit a statue he had sculptured especially for her as a wedding gift. They named it "Land of Hope."

Camilla's advertising campaign and Peter's broadcast was a great success, and Mr. Hoyt expressed his pleasure and surprise on learning that Camilla was the author and artist who was so ably stimulating the Paris scholarship, and he prepares for his journey to France. After the ship's departure, Peter and Camilla go on his way to his cabin when he meets Avis Werth. During the voyage, Avis tells Peter that Camilla smashed his scholarship exhibit in a fit of temper, and he believes her.

(Now Go On With The Story)

## CHAPTER LIX

Camilla did not recognize her visitor for a moment, so long had it been since their last meeting. But after a moment, she recalled his name. "Oh—Mr. Matson, good afternoon."

He extended his hand, even before she offered hers in greeting, like the clumsy make-believe gentleman that he was. "The very same—Camilla. Lord, but you look well. His frank glance admired her from head to heel. And no wonder! Did you just go up in a rocket to success? What do you think, I listen to every one of your broadcasts?"

She smiled readily. "It's nice to know that someone listens in. But why should you be interested in children's stories?"

"I'm not. I listen just to hear your voice."

Her manner became more aloof. "Is that what you came here to tell me? If it is, I'm frightfully busy. Mr. Matson."

"Oh, see here, little fireworks, don't you get so peevish over a little thing like that. No, I came here to tell you something that I think you might like to hear. How about it?"

"Well?" she waited.

"I just heard the other day that they accused you of destroying Peter's exhibit piece."

"Well—I didn't. And Peter knows that."

"Wasn't it that clawed cat, Avis Werth, who accused you of it?"

"What difference does it make if she did?"

"I just thought she might be able to convince him that you did."

"That's a silly thing to bring up now. Peter is on his way to Paris, as you well know."

"So is Avis—on and on the same boat," he watched her face closely for the effect, and was gratified with the result.

She grew alarmingly white, as if she had been struck a terrific blow. Her head reeled sickeningly. But she rallied almost instantly and managed to reply bravely. "That's a strange coincidence, isn't it? At least, Peter will have pleasant company on a slow voyage."

"Lord, you're a brick, Camilla. I know how that gets you. You can't fool me. That is, if you came here to help me, because I've always been crazy about you and can't bear to see you get a raw deal. Want to know who destroyed the statue?"

She hesitated for a moment. "It would be rather a relief to have the mystery solved."

"Well—I did it."

Her startled eyes met his with amazement. "You? But why—and why should you confess it to me?"

"One at a time, if you're going to give me a raw deal, you'd better give me a raw deal in my pocket. I've told you to give you a first deal. Reason given above. Next, I did it for two reasons: for revenge on Peter for a former little incident which you may recall, and to increase the possibility of my own success. There was no doubt that he was one of my best rivals. That eliminated his chances, I thought, and increased mine by one. The results proved that I was right there. I was the Nels Nelson whose 'Flight' was second and last in the exhibition. So Peter was my best rival, even with a substitute entry." He laughed harshly.

"I may even have bettered his chances by what I did, and hurt my own. Well, he won. Oh, yes—one thing more. You will wonder how I did it. I slipped upstairs and into his studio that night of the party, and was listening in the lower hall when you were discovered there. I thought it was a lucky break for me."

He paused.

"But I still don't understand why you are telling me. No one ever suspected you. Don't you know that I could have you arrested?"

"You won't," he said confidently. "Neither would Peter. After all, I have to admit that he's one swell guy. Besides, he won, didn't he? What's his kick? That group probably had more kick in it than a dozen 'Inspiration's. But there is more to my story, girlie. Not only did I put Peter there but he landed myself in a clog with a silver lining. Maybe I didn't deserve it, but just the same I am there and riding pretty."

"Peter can have all the Paris scholarships he wants—me for the good old girl. I only wanted to go to Paris to tide over the depression. We can see each other often, and when you are settled, we can have such glorious times together—while we wait." She did not say what they would be waiting for, but it hung in the air between them.

His silence seemed to be an acceptance of her plan.

(To Be Continued)

Gossip is usually the outcome of doing more talking than thinking.

MAKE YOUR FALSE  
TEETH HOLD FAST

Bat, talk, sing and shoot and never lose your front teeth. Your false teeth stick all day long when you sprinkle on Dr. Wernat's Powder—they stay put. Prescribed by world's leading dentists—they know it's the best! Costs but little—any druggist.

## What The Ships Bring

Manifest Of Cargo From Foreign Ports Fills The Imagination

Cutliff bones and crocodile skins, geranium oil, myrrh, civet and ambergris, hides of leopards, opals, golden ingots and silver ore, acorns of boxwood, pelicans, coars and roasts of pumpkin seed. The list is not from the inventory of presents carried to Solomon by Sheba, but from the records of the United States Customs Service. It represents but a fraction of the articles and products arriving in the port of New York in a single midsummer day, to be lifted from the holds of steamers into the towering warehouses in giant trucks, instead of upon the backs of camels or of slaves. A mere reading of the list makes the imagination wander, and the mind is led to wonder how the goods come in, and how they are carried to the markets of the world.

Pepper, rubber, tapioca, flour, bamboo shoots, ingots of tin, live tortoises, alabaster, tea and tuna-fish, kegs of mate, cases of lily-of-the-valley pipe, bags of lignumvitae and ginseng, dry salt, conchoidal, hard, skins, harmonicas, electrolytic mud and wines from Bordeaux, powder birds, and fish from South America, church vestments, tobacco from Istanbul, small fpm, Casablanca, and other exotic foods come in regularly from the tropics.

Pepper, rubber, tapioca, flour, bamboo shoots, ingots of tin, live tortoises, alabaster, tea and tuna-fish, kegs of mate, cases of lily-of-the-valley pipe, bags of lignumvitae and ginseng, dry salt, conchoidal, hard, skins, harmonicas, electrolytic mud and wines from Bordeaux, powder birds, and fish from South America, church vestments, tobacco from Istanbul, small fpm, Casablanca, and other exotic foods come in regularly from the tropics.

BUS IN WRECK

Rimby, Sept. 24.—Four residents of Rimby were passengers on the northbound Greyhound bus when the accident occurred last week on the highway a few miles north of Ponoka. The Rimbyites were Mr. Godfrey Birch, Mr. and Mrs. Henry Zerney and son—they all escaped without injury.

Mrs. Zerney was on her way to visit an aunt in Edmonton, prior to starting on a trip to Germany where she expects to spend some months. Mr. Zerney will leave Rimby for Germany late in the year and will join his family abroad.

LACOMBE REBEKAH'S

Lacombe Rebekah Lodge 107, celebrated the institution of Rebeccah by holding a social evening on Monday evening in the lodge rooms. Guests included members of Magnet Lodge No. 12 and their wives. The programme comprised contests, cards and dancing, followed by a delicious lunch. After lunch Mrs. Geo. Brooks on behalf of the lodge presented a gift of silver teaspoons and butter knife to Mrs. Hugh Thompson, a member who recently set sail on the sea of matrimony.

# A FURTHER STEP on the Road to Recovery

## A Statement by the Prime Minister of Canada

THE Dominion of Canada will offer for public subscription within the next few days the 1934 Refunding Loan. It is an undertaking of such significance to every citizen that I think it fitting to present this brief explanation of its close relation to the welfare and continued progress of our country.

The 1934 Loan is not an incidental effort. It is a part—and an essential part—of the great debt conversion programme in which Canada has been engaged since 1931, and by which we are refunding at maturity the large loans borrowed for wartime purposes. The national importance of this programme—and of the 1934 Loan as part of it—cannot be over emphasized. It is important from three aspects: 1.—National Credit; 2.—National Economy; 3.—National Recovery. I shall deal with each of these in turn.

### 1. National Credit

National credit means to a nation what an honest reputation means to a man. Its maintenance is a primary essential and necessitates that each obligation be met, fully and promptly, as it comes due. Our debt conversion programme is then, in the first instance, our method of meeting our obligations and thus maintaining our credit.

By this programme Canada has already refunded \$55,000,000 of maturing wartime debt, and completion of the 1934 Loan will bring the refunded total to over one billion dollars. As a result, Canada's credit stands notably high, both at home and in the great money markets of the world.

Striking evidence of our high credit standing was given within the last few months when Canada secured immediate over-subscription of a long-term loan in London at a price to yield the investor less than 3½% and, in New York, obtained a one-year loan of \$50,000,000 bearing interest at 2 per cent. And there is equally striking evidence at the present moment in the fact that every internal issue of Dominion of Canada Bonds now outstanding is selling today at substantially above its issue price. The twelve-year 4½% Bonds of the 1933 Refunding Loan, issued at 96½, are now selling at 104 to yield approximately 3½%.

### 2. National Economy

The debt conversion programme, in the second place, is providing substantial savings in public interest charges. The debt which we are refunding was incurred with interest rates at artificially high wartime peaks. Refunding is now being accomplished with interest rates throughout the world moving steadily downward toward more normal levels—an encouraging world movement which is essential to business recovery. By refunding under these conditions Canada has already obtained a reduction of the previous interest charges amounting to more than \$9,000,000 per annum, and completion of the 1934 Loan will provide a further saving of over \$5,000,000 per annum.

The annual saving of over \$14,000,000 thus secured has a direct cash benefit to every taxpayer. This saving has much more than offset the interest charges on the debt, which has been incurred to meet the extraordinary burden of unemployment relief. It has, to a considerable extent, offset the heavy burden which the depression period has imposed with respect to railway and other current requirements. It will also pave the way to tax reductions with the return to better times.

### 3. National Recovery

The debt conversion which Canada has achieved since 1931, by thus maintaining national credit and securing national economy, has been a major factor in our progress toward business recovery.

A year ago, preliminary to the 1933 Refunding Loan, I took occasion to express the belief that Canada had passed the low point of depression and was definitely upon the road to recovery. Today, our progress toward recovery is a matter of established fact. Since the low point of February 1933, the trend of business has been moving steadily upward in an improvement so marked and so consistently sustained that we need no longer doubt its reality. The facts of business recovery are written beyond dispute in our statistical records. The most significant indices relate to physical volume of business, industrial production, orderings, electric power production, employment and prices. Here is the record in each case:

	Percentage Increase Since Low Point of February 1933
Physical volume of business.....	13.8%
Industrial Production.....	15.7%
Orderings.....	10.3%
Electric Power Production.....	12.4%
Employment.....	14.7%
Wholesale Prices.....	4.0%
Farm Products Prices.....	7.7%

In the case of manufacturing employment and prices, the latest figures available are those for August in other cases, those for July.

Our external trade figures are equally encouraging. During the first eight months of the present year, exports of Canadian products increased approximately \$99,000,000, or 32.7% over the same period last year. The corresponding increase for imports has been slightly under \$95,000,000, or 38.2%.

### A Further Step

Anyone who reflects upon these three aspects of credit, economy and recovery will at once appreciate that the debt conversion programme is vitally important to every Canadian and that, consequently, the success of the 1934 Loan is the personal concern of every man and woman in the Dominion.

The 1934 Loan is a further step in a great national undertaking; its success means a further step on the road to recovery. I know that I need not stress the attractiveness of the Loan, as the soundest possible investment, for that will be universally recognized. I do, however, earnestly call upon my fellow Canadians to support this Loan to the limit of their abilities as an opportunity to promote our national welfare. I know of no way in which the individual citizen can render greater service to himself and to his country.

*P. B. Bennett*  
PRIME MINISTER OF CANADA

## DOMINION OF CANADA 1934 REFUNDING LOAN

Mr. and Mrs. B. McGeech of Port Hope and his father and mother of this district had the misfortune to have their car damaged in an accident on Saturday night while going to town. We hope they are not suffering any bad results from the shock.

The telephone meeting was held in the hall on Monday last and was attended by a large crowd.

We hear that Mr. and Mrs. Jim Sprink are remodeling their house.

The annual Food Supper is to be held in Lincoln 1934 on October 12. A good feed promised. Come and see for yourself. Dance after, starting at 8:30 and good music assured.

### GUARANTEE BILL IS BEING MET

Announcement has just been made that the Alberta Wheat Pool for the third successive year has met in full the percentage of its obligations to the provincial government in connection with the 1933 wheat pool overpayment.

At the time the government guarantee was agreed upon there was considerable misgiving as to the ability of the pool to make repayment in view of conditions in the wheat market. The record of repayment to date is reassuring. The pool has been doing a fair share of the grain business of the province. Its last financial statement showed liquid assets of over three million dollars available.

It will be a most desirable outcome if the pool can pay off the government guarantee and thereby re-establish the equities of thousands of farmers in the big line of elevators, which were offered as security for the guarantee.

### MORNINGSIDE P.O. SAFE BLOWN

On Friday night last the post office at Morningside was robbed by yeggs who blew the safe and escaped with a small amount of cash and stamps, as well as a look of money orders. The police are on the trail of the robbers.

## Decline in Cheese Exports

Canada Is Losing Market Of United Kingdom

What has happened to Canada's exports of cheese to the market of the United Kingdom is clearly indicated in a statement of the Bureau of Statistics at Ottawa that during the first six months of the present year our shipments of cheese to that market actually fell to fifth place with only 30,845 cwt. being forwarded across the Atlantic. In contrast with this, New Zealand remained in first place in the British market with 1,316,700, Australia being second with 67,000, the Netherlands third with 61,000 and Italy fourth with 50,928.

Two years ago, for the corresponding period, Canada was in third place, coming behind New Zealand and Holland, and prior to the war Canada's supply of cheese to Great Britain was more than double that of New Zealand.

A further statement of the Bureau reports that during the year 1933 Canada's production of factory cheese experienced a further drop, totalling 111,044,628 pounds, or eight per cent. The total value of the cheese made was \$11,115,915, a decrease of two per cent, the average factory price per pound having advanced from 9.44 cents in 1932 to 10.01 cents in 1933. On the other hand, the production of creamery butter in the Dominion rose to 218,532,307 pounds, an increase of 10.5 per cent, the preceding year of two per cent.

It is evident that Canada is continuing to lose her grip upon the British cheese market, where once she was supreme, and if things continue at the present rate it will be only a matter of time before she has been swept off that market by the force of New Zealand's competition.—Brockville Recorder and Times.

## Europe's Newest Capital

Kiev Is Now Chief Centre Of Ukrainian Republic

Europe's newest capital is established in one of Russia's oldest cities—ancient Kiev, on the banks of the Dnieper river.

Kiev, from now on, will be the seat of government of the Ukrainian republic of the U.S.S.R. Government officials and members of the central committee of the party in the Ukraine already have moved into their new quarters and documents, files and equipment were transferred from Kharkov, the old capital.

Extensive ceremonies marked the transfer, for Soviet Russia regards the change in capital as a proof of the stability of the Communist regime in the southern regions, and as a sign of the end of the civil war and the beginning of a new era of peace and prosperity.

Kiev is traditionally the capital of the Ukraine. From that city, the Czars' governors administered the province and there the first Communist government was set up. The capital was moved to Kharkov only during the civil war when it appeared that the Whites might overrun the town.

Kiev is one of Russia's oldest cities. It was founded a 1,000 years ago and for generations figured as the most important link between Moscow and the eastern empire of Constantinople. In the 13th century, the Tatars of the Golden Horde took the city. Later it passed into the hands of the Lithuanian Vilnois, who there proclaimed themselves "King of all the Russian countries." It was captured by the grand dukes of Moscow in 1654 and from that time on became a truly Russian city.

## Building More Warships

Construction Of Twenty-Four Planned By United States

The world public is given something to look at and think about in announcement from Washington that the United States is going in at once for construction of 24 warships. The cost of these ships is not given, but it will run into many millions. This expenditure is being made when the United States already has a fleet of 100 ships, the largest of over seven millions of dollars; when 10,000,000 of its population are still unemployed and want is rampant through the land; when through drought and other factors, agriculture is almost throughout the country is in the most serious position it has ever been, and when the whole economic situation in the nation is in a critical state.

The announcement of this construction comes at a time of growing world consciousness that in arms races there is no guarantee of peace, indeed that in armament-building by one nation there is only incentive to build correspondingly in other nations. It comes at a time of growing public recognition that armament is not only an incentive to more armaments.

All this comes at a time when there has never been more talk of peace. It is only talk!—Higgins Leader-Post.

A new machine determines scientifically how sharp a razor blade is, how much it is dulled by use in shaving, and how successfully it can be re-sharpened.

Proud Mother—Yes, he's a year old now, and he's been walking since he was eight months old.

Bored Visitor—Really? He must be awfully tired.

## Indian Adviser Retires

Doctor Ardagh Will Be Missed By B.C. Tribes

Dr. Vernon Ardagh, the "Old Doc" who has been confidant and adviser to northern British Columbia Indians for 44 years, has retired to Vancouver at the age of 72.

He was a pupil of Westward Ho school in Devonshire with Rudyard Kipling, who was nicknamed "Gig-lamps" because he wore glasses.

Dr. Ardagh graduated from Edinburgh medical school in 1885 and was sent by the Church of England Mission Society to British East Africa, now Kenya Colony. He was invalided home a year and a half later with malaria.

British Columbia was selected by the society as the young doctor's new field. He arrived at the Indian village of Kootenai in 1889 and, two years later, established the first hospital in that area.

The doctor visited England in 1901 and remained there 10 years, but returned to British Columbia in 1911 to resume the practice of medicine under the direction of the bishop of the diocese. He ministered to the Indians at Kiatnaga, on the Babine river, and at Kiatnaga, on the Skeena. For 22 years he has lived at Kiatnaga village.

Dr. Ardagh speaks many Indian dialects, including Tsimshian, Haida and Chinook.

## Fond Of Adventure

German Baroness Says She Likes To Keep Moving

Baroness Dorothea von Fitch, world traveller and said to be the first woman to cross the Atlantic in a small boat without an engine, paid a fleeting visit to Victoria, B.C., and announced her next journey would probably be to the Balearic Islands, off Spain.

Tired of aristocratic court life of Weimar, Germany, the tall blonde, blue-eyed woman, 42, who sported a bobbed hair, left her home some years ago and took to a life of travel on the Seven Seas. And she says she wants to keep moving.

In 1930 she left Germany with her husband and a friend to cross the Atlantic in a 30-foot boat, the Tei Rapunga, with no engine. Her cousin, General Werner von Fitch, disapproved of her going on the expedition, she said, but she could not resist the opportunity for adventure. She swears to make her journey about the world in small frigates.

## Model Aeroplane Competition

Winnipeg Boy Carries Off Honors At Canadian National Exhibition

Taking a first and two seconds, Leonard Fisher, 15-year-old Winnipeg boy, carried off honors in the junior section of the fourth annual Canadian model aeroplane competition at the Canadian National exhibition.

The Winnipeg lad took the indoor endurance title when his model soared in the air for four minutes, 24.4 seconds. He got second in the indoor fuselage and the semi-scale.

He took second place in the indoor fuselage when his model remained in the air for 16.4 seconds and was awarded second place in the semi-scale with 53 points. His plane stayed aloft 57.7 seconds.

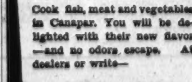

Fourth place in the senior semi-scale went to Art May of Winnipeg. He received 75 points, and his model was in the air for 1.6 minutes.

India has the second largest population in the world, with 352,986,000 inhabitants.

The California Institute of Technology has built a 1,000,000-volt X-ray tube.

Cook fast, meat and vegetables in Canapar. You will be delighted with your new flavor—and no odor, escape. At dealers or write—

W. N. U. 3062

## Soviet Claims Scouted

Claims from Moscow that Russia had usurped second place among the world's gold producing countries, superseding Canada, have been received with almost universal scepticism. Apparently, the statement has been interpreted as just another of those efforts in propaganda with which Soviet authorities keep their nationals to further sacrifices, but which singularly fail to impress the outside world.

During progress of the first five year plan, Moscow deluged the world with claims of amazing achievements, which now that the ardors of the period have subsided, are being assessed at their true worth. There is no gaining the great advances made in certain industries, particularly the so-called heavy industries, under the program initiated by Lenin and carried into effect by Stalin. In some instances these have been spectacular, but (and this is the rub) seldom have they been quite as significant or outstanding as the claims made concerning them.

Several of the leading magazines and newspapers of Britain and America are devoting considerable space to reviewing the Soviet industrial and agricultural achievement. These have been equitable, unprejudiced and, probably based upon the true facts, for truth and not antagonistic propaganda is what the public needs these days. The claims made on behalf of socialized endeavor by proponents of Socialism of the Russian variety, apparently do not stand the test of statistical investigation. Alan Monkhouse, the one of the British engineers sacrificed for propaganda purposes in the notorious sabotage trials of a year or so ago, in a book of his experiences in Russia is surprisingly sympathetic to the Soviet planning scheme in the light of the circumstances preceding his deportation. Paying some attention to the statistical record of industrial achievement, he shows that the Soviet government's own figures in specialized lines such as house building do not compare favorably with similar achievements in capitalist and imperialist England, recorded at the same time. He cites several particulars in which Soviet authorities claimed to have out-distanced their degenerate and collapsing capitalist contemporaries, which are not substantiated by the facts.

Apparently, the same is true of the gold production, backed by Russia threats that, having overtaken Canada they will shortly overtake and pass South Africa in production of the precious metal. In reply to this, Canadian mining authorities maintain that, while undoubtedly Russia has been creeping up in production, it has not yet supplanted Canada as ranking second in production of newly mined gold. Much of the Russian gold, it is claimed, was withdrawn from hoarding and, therefore, it is old gold reclaimed.

South Africans scoff at what they term a bombastic claim, and have no fear of losing premier place among the world's gold producers. This contention is backed by Dr. P. S. Nazzari, formerly a famous Russian geologist and now a fugitive from the Bolsheviks. His statement, based on actual knowledge of the various Russian goldfields and not upon political bias, is to the effect that nowhere in Russia do gold-laden bodies occur with the regularity and in the volume seen on the Rand in South Africa. "If Russian gold fields ever reach the stage of providing competition for South Africa it will be at tremendous cost of time and labor of transportation," he concludes.

## Salvaging Gold From Chimney

U.S. Assay Office Reclaims It From The Soot

Since the U.S. government devaluated the dollar, almost doubling the dollar value of every scrap of gold, the Assay office in New York has been using every conceivable method in its melting room to conserve the metal. The Assay office is housed in a relatively new building, white and severe, at the corner of Old Slip and South Street. One of its important installations is called a fume precipitator—in reality, a series of metal sleeves, each plumed by a chain. Alternating currents run through the chains and the sleeves; and, as smoke passes up the chimney, the soot particles, containing minute quantities of gold, are deflected from the air by this electric barrage, and fall to the bottom of the flue. This precious residue is collected once or twice a year by men who go into the basin of the chimney and shovel it out. The Assay Office reclaims \$10,000 to \$15,000 on the sale of gold reclaimed from chimney soot. Even the dust on the walls is collected for gold.

## Discover New Rays

Eight Death-Dealing Rays Discovered By Woman Scientist

Eight death-dealing rays of ultra-violet light have been identified by Dr. Florence E. Meier, young woman scientist of the Smithsonian Institution.

The work completed by Miss Meier, hailed as a valuable addition to the important study of animal reactions to various rays, reveals the new killer rays as black sheep of the normally beneficial violet ray group, which are known to cure rickets.

Humans would not be slain by the newly discovered rays, but they are certain death to green algae, the one-celled plants that grow in lakes and rivers.

Cold draughts of air in gardens are often responsible for the backward growth of flowers and plants.

One-fifth of the people of the earth live in Africa.

Put up only by The T. Millbrae Co., Ltd., Toronto, Ont.

Change of Climate, Diet, Water Often the Cause of Diarrhoea

If you are suddenly attacked with Diarrhoea, Dysentery, Colic, Cramps, Pains in the Stomach, Summer Complaint or any Looseness of the Bowels, do not waste valuable time, but get a bottle of Dr. Fowler's Extract of Wild Strawberry and see how quickly it will relieve you.

This bowel complaint remedy has been on the market for the past 38 years. Proof enough that you are not experimenting with some new and untried medicine.

Do not accept a substitute. Get "Dr. Fowler's" when you ask for it, and be on the safe side.

## Was In Two Rebellions

Alberta Veterans Curved Despatches For General Strang

In Alberta 50 years ago, when highways were just fading from the western frontier with the coming of the first Northwest Mounted Police, and when Indians were still on the warpath often, Charles F. Stewart, now 69 and retired, the lives at Edmonton.

Native of the prairies, he saw two rebellions at first hand. Son of the chief factor of the Hudson's Bay Co., he was a lad of eight and lived a few miles below Fort Garry (later Winnipeg) in the troublous days of the first Red River rebellion. He can recall seeing the soldiers coming up the Red River. As a youth of 20, when the mails were stopped by the Saskatchewan rebellion of 1885, he went on the frontier line, carrying dispatches for General Sturgis' army in the field. He made several trips on horseback between Saddle Lake and Fort Pitt.

His predecessor on the mail job, Peter Campbell, was on the driver's seat when the Calgary coach was held up and the mails robbed by highwaymen in the only case of its kind in this part of the west.

It was no picturesque coach that was in use in 1891 but a lumber wagon with an open centre for pack-loads of mail and a driver who was considered a superstitious luxury, which may be resorted to only in winter and on holidays. And even on those occasions people often prefer carrying their hats and shoes in their hands to save tear and wear.

## Proposed Tax On Noise

Idea Of British Minister Of Transport May Save Nerves

A tax on noise is proposed to save the nerves of the people of the United Kingdom. It is thought that taxation may succeed where all appeals have failed in the matter of unnecessary noise, and the suggestion of a tax was made in a letter from Leslie Hore-Belisha, minister of transport, which was read at a conference of the Anti-Noise League at Oxford.

"All new heavy motor cars put on the road since January, 1933, have to be fitted with pneumatic tires," he wrote, "and the scales of taxation have been so framed as to give a strong incentive to people to substitute pneumatic tires on existing vehicles. The heavy vehicle on solid tires which caused so much unnecessary noise in the past is rapidly disappearing."

"Regulations also forbid the use of motor vehicles and trailers which have caused excessive noise, and the sounding of horns on stationary vehicles."

"The road traffic bill proposed further to prohibit the use of the horn in prescribed hours and places of silence," Mr. Hore-Belisha stated that in order to gain exact knowledge of what really causes noise the ministry has invoked the best scientific assistance. He expressed the hope that the motor manufacturing industry will co-operate with the government in a determined effort to find a remedy for present unnecessary and harmful noises.

## Rebuilding Viking Boat

Oak Timbers Intact After Being Submerged Thousand Years

A Viking boat has been "reconditioned" at Danzig, after one thousand years. Workmen engaged in digging a ditch at Oliva found the remains of the boat only five feet beneath the surface of the ground. The sturdy oak planks of which the boat was originally built had defied the ravages of time so successfully that it has been possible to reconstruct the vessel in its entirety. The boat is thirty feet long, with places for eighteen oarsmen. Iron nails had been used in the making, as well as wooden pegs. Parts of the gunwales, with the original rowlocks, have survived, and much of the masts with which the vessel was packed to make them water-tight is still in place.

## Or Even A House

"Automobile owners will leave their vehicles unlocked with keys at hand and then complain to the police when someone borrows or steals them," remarks the St. Thomas Times-Journal. Well, why should it be necessary to lock a car, and not a horse and buggy? asks the Woodstock Sentinel-Review.

Nearest European Port To America

Galway, the new port of the Cunard and White Star Lines in Ireland, is Europe's closest port to America, which country it directly faces. It is 500 miles nearer to New York than is Liverpool.

## Talk About Economy

Two Towns In Bulgaria Have Everything Else Deaf

There is a legend current in the picturesque little Balkan town of Panagurihte that when God once was bestowing his gifts, he allotted close-fistedness to the inhabitants of two towns—Gahrovo and Panagurihte, stressing it more generously on the latter because of its weird and unpronounceable name.

On that account the parsimoniousness of either town has become proverbial. And they are dire rivals in their miserliness, being too expensive a matter, but sting them by various devices which makes the beard stay smooth. In both towns families make use of but one spoon or fork, passing either of them around when taking their meals which they argue, saves extra labor, and what is more important, food lasts longer, as each member of the household thus must await another turn for a mouthful.

The aged people say that this method of eating prevents one from overeating, saves him from indigestion and many other stomach ailments, due, they assert, to the use of too many spoons, forks, knives, and too many dishes.

In both towns hats and shoes are considered a superfluous luxury, which may be resorted to only in winter and on holidays. And even on those occasions people often prefer carrying their hats and shoes in their hands to save tear and wear.

## Million Miles Her Objective

Elderly Woman Traveller Expects To Make Real Record

An interesting old lady who can probably lay good claim to the title of world's champion traveller is Mrs. Ella G. Munson of East Rockaway, Long Island, who has sailed from Montreal to add the Saguenay district to her list of places visited. Mrs. Munson has travelled close to 1,000,000 miles and at 72, hopes to bring her total to 1,000,000.

In all her travels, which include 53 trips across the Atlantic and 10 across the Pacific, Mrs. Munson has never encountered a severe storm nor an accident. She has tried almost every known method of transportation, including canals, elephants and rikshaws, but has never yet been in a plane. Only one thing could induce her to fly, she said, and that was an invitation from Col. Charles A. Lindbergh to go up with him.

Mrs. Munson's trips are seldom planned in advance. She stays at home until the urge to travel comes, then she packs her trunks and is off. "I can get ready to go around the world in 24 hours," she said.

Mrs. Munson was somewhat at a loss to explain her wanderlust, as her ten brothers and sisters are all "stay-at-home bodies," but thought she might have inherited it from Captain John Munson, an ancestor who in 1642 led a pilgrimage of Munsons to Massachusetts.

## Treatment For Lepers

Health Officer In Indo-China Claims New Discovery

New hope was held out to the world's "untouchables," sufferers from the dread disease of leprosy. A score of years devoted to study of the plague culminated in Dr. Georges Hippolyte Munson's announcement at Saigon hospital in French Indo-China that he had succeeded, through intravenous injections of methylene blue solutions, in converting contagious into non-contagious cases.

The noted colonial health officer said his method would be tried out in all provinces of Cochinchina. Through its use in connection with chemotherapy, he added, he hoped to obtain definite cures.

The general council of leprosy submitted to this treatment improved, Dr. Monte said. Their ulcerations healed and their leprous lesions faded.

No man can tell what his wife is going to do by what he tells her to do.

Five Generations of Canadians have enjoyed its soothing lather

Looked The Part

He was a golfer who always played in his oldest clothes. One day he set out for the course, his clubs slung over his shoulder.

Walking down a street he saw a woman leaning over her garden gate, eyeing his approach angrily.

"You're very late," she said, sharply, as he drew level.

"Late?" echoed the astonished golfer.

"Yes, late! You promised to sweep my chimneys at eight, and it's past nine o'clock now."

## Millions Of Acres Of Finest Wheat Lands In West To Come Under Reclamation Plan

Reclamation of millions of acres of the finest wheat land in the world, desolated by successive years of drought, is the immediate object of four governments in Canada, the federal, Manitoba, Saskatchewan and Alberta.

Plans have been laid already to relieve distress in the dried-out areas of the prairies, feed the impoverished people, provide seed for next year's crops and look after millions of half-starved cattle and horses. But there is another object in mind—how to reclaim for the land its binding and freshness due to years of drought.

For months the Dominion department of agriculture has been experimenting with grasses gathered from all parts of the world to determine the best to act as a binder to the wind-torn soil of the prairies. Agricultural experts believe many parts of the West never will regain their paramount place as wheat producers until the soil has been rebounded and rejuvenated. Eventually it may lead to reforestation and irrigation on a wide scale.

Some idea of the vastness of the problem may be gathered from these figures: In Manitoba, 1,000,000 acres in 13 municipalities affected by the drought. Sixty per cent of the cultivated acreage of Saskatchewan has been dried out and 40 per cent will not produce a marketable crop this year. The dry area in Alberta is 2,000,000 acres, a decrease from last year. Some sections of the prairies have had five crop failures in a row.

Agreements were signed last week between the Canadian railways, the federal government and the prairie governments providing reduced rates on livestock feed moved to the dry sections and cattle and horses shipped to northern ranges. It will be impossible to transfer all the half-starved stock from the dried-out areas and some are not worth the cost of feeding. It may result in wholesale slaughter of cattle to be processed into hog feed.

A trickle of emigration has started from the dry sections but this is not regarded as practical on any large scale. Saskatchewan, for example, has 40,000 families, probably 200,000 people, have farms in the drought areas. About 100 families have deserted their farms in the south and selected new land in the north, but this movement is limited to the available acreage of unbroken land of good quality. In addition, western farmers are the world's best optimists and, like everybody else, dislike leaving their settled farms.

It is impossible to say how much the Dominion will spend this year in drought relief. It has been placed between \$15,000,000 and \$20,000,000 in addition to direct relief for the people. It will be impossible to give an estimate until a decision is made on the campaign to reclaim the land and this is not expected for some time.

The Dominion already has taken steps to thwart speculators in hay, due to the needs of the west and the small Canadian crop. It has passed regulations forbidding the export of hay without license. This will conserve the Canadian supply in view of crop failures in the United States and Washington's removal of the \$5 a ton tariff.

### English Bakers Would Want Canadian Flour

If They Could Get Better Price For Their Bread

A five-year plan is underway in Great Britain in an effort to add to the consumption of varieties of bread and in some ways obtain price regulation, stated J. H. Merrett, of Cardiff, one of 12 members of the National Association of Master Bakers and Confectioners visiting Canada.

Both Mr. Merrett and William Collier of Leigh, past president of the association, said a bread price war had prevailed in Britain for the last two years. In the Manchester and Liverpool district, they said, until four months ago bread sold as low as "a penny a pound delivered to the door."

If the bakers can obtain a better price for their bread, they added, they will demand the higher quality flour from Canada. They declared the percentage of Canadian wheat in their bread was not as high as it should be at present.

### Grows Coffee Plants

While on a trip through Michigan a year ago, a London, Ont., resident tasted coffee and peaches grown there. On his return he brought seeds of both plants. Now he has three coffee plants and a peach vine. The peaches taste like Canadian grown, but grow on a vine instead of a tree. There are no pits and are about the size of a goose egg.

Who knows but that as now powerful engines pull the freight cars, some day a powerful plant will pull half a dozen gliders at its heels—the freight train of the air.

Gold, mixed with molten glass, produces the finest of all tinted glasses, a rich, royal ruby.

W. N. U. 2023

### Aid U.S. Farmers

#### Large Sums To Be Paid Out To Help Agriculturalists In States

More than \$1,000,000,000 is destined to go into the pockets of United States farmers through the agriculture adjustment administration before the end of 1935.

Cotton, tobacco, wheat and corn-benefit payments will total \$775,402,000, officials estimated. Of this sum \$262,982,519.21 had been paid out up to August 25.

Of the latter payments, cotton farmers have received the lion's share, \$152,510,793. Wheat farmers netted \$67,781,951; corn-hog farmers, \$46,815,988, and tobacco growers, \$15,773,795.

In addition, to the \$775,402,000—which is being paid out to farmers for controlling production—cattle raisers will net about \$120,000,000 and sheepmen approximately \$7,500,000 by selling drought-stricken animals to the government.

The total for farm adjustments close to \$1,000,000,000.

The figures do not include benefit payments under the sugar program which is still being drafted.

### A Remarkable Test

#### Wireless Telephone Talk Heard Distinctly Over Extremely Long Distance

Wireless telephone link has been established between India and London and recently a telephone conversation between the Collector of Ranchi, and a London Post Office official was heard distinctly when the first test was made of the proposed wireless telephone service between the two cities. This is remarkable, because the voice traverses 2,000 miles of land line, via Lahore, Agra, and Surat, before being sent out from the Kirkee wireless station.

By Ruth Rogers

JACKET DRESSES ARE ALWAYS FAVORITES FOR IN-BETWEEN SEASON WEAR WITH SMART WOMEN

You'll like to-day's model for its smart individuality.

It is grey-blue, plaided in wine novelty rayon with woolen effect. Plain wine made the rever jacket collar, with wine button trim.

The jacket is the youthful boxy type. The dress has easy to handle rayon sleeves. The bodice buttoning at the front creates a very slimming line. Plaids lend animation to the slender skirt.

Angora plaids in bright colors, crepe marocain, heavy novelty crepe silk, lightweight wools, etc., are nice ideas for its development.

Style No. 484 is designed for sizes 14, 16, 18 years, 36, 38 and 40 inches bust. See pattern envelope for material requirements.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

### Advance Of The Telephone

This Utility Has Spread All Over The World In Brief Space Of Time

It is only 35 years since the long-distance telephone was inaugurated, but in this comparatively brief period of time—a period within the memory of many citizens to-day—35,000,000 telephones have been established in 55 countries of the world.

This figure was given out in Toronto the other day on the occasion of the telephone's 35th "birthday anniversary." It was recalled that the telephone had its birth in the mind of Alexander Graham Bell, a man who divided his life between Canada and the United States and who inaugurated long-distance telephone conversation with experiments along telegraph wire over a distance of seven miles between Brantford and Paris, in Ontario.

The number of telephones, by continents, to-day, runs as follows: North America, 20,894,000; Europe, 9,336,000; Asia, 1,300,000; Oceania, 750,000; South America, 605,000; Africa, 289,000.

These telephones are distributed among the nations thus: United States, 20,250,000; Germany, 2,950,000; United Kingdom, 1,750,000; Canada, 1,333,000; France, 965,000; Japan, 815,000; Australia, 476,000; Italy, 345,000; Russia, 321,000. It will be noticed that Canada has as many telephones as the 104,000,000 people of France and Italy together, and has more than the whole of Asia.

Any one attempting to write a record of the telephone from the standpoint of human interest would be assuming a most staggering job. Love, legitimate and illicit; murder plots; kidnappings; warnings of fire and flood; cold business deals; social snubbings; wars; political activities; diplomatic intrigues—this is just a handful of the things in which the telephone has figured over these 35 years. It has been an agency of gladness and of despair; it has exulted in humanity, and left it with a heart-ache.—Regina Leader.

### How To Organize A Poultry Pool

#### Preparing Poultry For Shipment Important Part Of Business

Producers' poultry pools, where farmers assemble, box pack and make ready their own poultry, are growing in popularity and utility in practically every province of the Dominion, and the reason why there is a poultry pool in every district is because the farmer, by pooling, willing, have not had the time to find out exactly how to proceed about the business. Markets pay a premium for poultry of the highest quality, when properly graded, box packed, and government inspected.

In all this work, the Poultry Service of the Dominion Department of Agriculture plays a leading part, assisting the farmers in every way in organizing and carrying out the working arrangement of pools. These services have just issued a pamphlet on why and how to organize a poultry pool, and the pamphlet is all the more welcome to the many farmers interested in that it places the matter in a nutshell. It shows that the assembling and preparing of poultry for shipment is as much the business of producers as the actual growing of the birds, and the overhead expenses of preparing for shipping is largely governed by whether or not every member of the pool does his share of the work. The steps to be taken to form a pool are clearly set forth.

### His Plan Worked

#### Oklahoma Man Used Chickens To Control Grasshoppers

With a hen house on wheels, Herman Haas, of Cherokee, Okla., plans to control grasshoppers by using his hen flock from one point of infestation to another. This summer Haas moved 475 young chickens onto a sixteen-acre alfalfa patch which had become overrun with hoppers. When the chickens had done their work he estimated they had saved at least a bushel of seed an acre. A. E. White, Alfalfa county agent, said grasshoppers may be used successfully as feed for growing poultry and young turkeys if a regular mash, grain and green-feed ration is also supplied.

### Home-Made Telescope

With some common tools, parts of a wrecked motor car and \$75, E. D. Tarbell of Kansas City, Mo., has manufactured a complete telescope in his basement. Tarbell used the mirror to polish the mirror, the differential housing of the wrecked motor car as the tube and added the \$75 for other necessary parts.

### The Latest Umbrella

Unbelievers for shoppers have just appeared in London. The top of the handle contains a dainty pencil. The entire handle may be turned and lifted to expose a surface on which shopping and other notes may be made and easily deleted.

No person shall publish an untrue, deceptive, or misleading advertisement in respect to eggs offered for sale or distribution, says the Canadian egg regulations.

Tennyson took 17 years to write his famous poem, "In Memoriam."

### SPEEDY CANADIAN GIRLS CREATED NEW RECORD

On the first day of the British Empire Games at the White City Stadium at London, this Canadian quartette created a new British record of 1 minute 14.2 seconds in the Women's 660 Yards Relay Race. From left to right: A. Dearnley, E. Meacher, L. Palmer and B. White.

### Reindeer In North

#### Four Year Trek Expected To End This Fall

After a trek of four years across Alaska and the northern corner of the Yukon, nearly 3,000 reindeer which were purchased by the Canadian government in 1929, are now at the west side of the delta of the Mackenzie river in the Northwest Territories, and wait the coming of winter when they will cross the river to the Mackenzie on the ice.

Under the direction of experienced reindeer herders the herd began the arduous 1,000-mile journey across the roof of the world from Napaktoklek in Western Alaska to the Mackenzie river delta in December, 1933. Early in January, 1934, the herd started on the 70-mile dash across the mouth of the Mackenzie from the west to the east side, but once out on the frozen river it was discovered that, owing to the high winds and blizzards which had prevailed during the winter, large stretches of the ice had been blown clear of snow, and as the deer cannot travel on glare ice it was necessary to make frequent and long detours from the route originally selected in order to get footing for the animals. To still further intensify the difficulties, after they had been out for more than 48 hours on the ice a heavy blizzard arose and in the midst of this the herd stampeded back along their trail to the grung area near Shingle Point where they had spent last summer.

Another attempt to cross the Mackenzie will be made in the autumn of this year when the delta freezes over again and with the selection of another route across the ice, which past experience indicates is more satisfactory, it is believed the herd will be safely delivered to the Department of the Interior, who will place them on the winter grazing range to the east of the delta of the Mackenzie, and the work of building up a new source of supply of food and clothing for future generations of the Dominion's northern natives will begin.

### Inventors Seldom Get Rich

#### Thousands Of Gadgets Are Never Granted A Patent

A window pane, which, on being broken by a burglar, creates an intense vacuum, drawing the hapless intruder into the room and holding him on the floor until captured, was among the 20,000 inventions of last year which were not granted patents. "Perpetual motion machines are the most popular, and about a hundred 'fresh' discoveries of this kind are made every year," a well-known firm of patent agents informed a representative.

### Only One Worthy

Although he has been dead 84 years, Henri de Balzac has just been awarded a literary prize of \$625. The French Society of Men of Letters, in Paris, has decided that no living writer was worthy to receive the award this year. The money will be given to the Balzac House in Paris.

"And he wants a room that doesn't face the sea, because he's just swum the Channel."

### Equalization Of Prices

#### Same Price For Manufactured Products East And West Is Advocated

Equalization of wholesale prices on all goods enjoying protection in Canada and produced in this country was advocated by J. D. McKenna, St. John, N.B., publisher, before the royal commission conducting an inquiry into Nova Scotia's economic situation.

"Why should two cities largely enjoy all the benefits of the tariff in this country?" he asked, after explaining a scheme by which manufacturers would absorb freight charges and place their products on the market at a uniform price—the same in Halifax and Vancouver as in Toronto and Montreal. Following his address, Mr. McKenna was complimented by the chairman, Prof. John Harry Jones, of Leeds University, England, who questioned him further regarding the proposal.

Replying, the speaker supplied figures to show that 85 per cent of the goods manufactured in Canada came out of Ontario and Quebec. The final cost of a finished article included all the taxes imposed by governments, provincial and Dominion. "As a result of this," he declared, "we in the maritimes who buy these goods not only pay our own taxes but, theirs as well—and that comes to a pile of money."

Equalization would help the cause. It would mean a standard price throughout the whole country. Prices as a whole would be adjusted with the purchasers in the central provinces bearing a more equitable share of the cost of production and these in the maritimes correspondingly relieved, he said.

### Student Has Unusual Hobby

#### Ontario Boy Trying Out Culture Of Silkworms

Culture of silkworms from the egg to butterfly stage, is the unique hobby of Ladislav Dominick, a student at Collegiate Institute Vocational school in Peterboro, Ontario.

Dominick procured the eggs from his native Hungary, where, due to the favorable climate, the silkworm flourishes. Canadian culture of silkworms, according to Dominick, is unlikely to be established on a commercial basis because of extremes in climatic conditions.

### A Timely Warning

If there are still people who will invest in unknown stocks on the advice of someone they don't know on a telephone tip, their friends should watch them. With the new popularity of gold mine stocks, the telephone racketeers are busy again. It is not the old direct long distance phone call scheme, it has local variations, but is still a trap to sell shares to dupes ready to part with good money in blind faith on the advice of strangers over an over-extended telephone call.—Brandon Sun.

The automobile has given work to more than 4,000,000 persons.

## Interesting History Of Panama Dates Back To The Time Of The Earliest European Explorers

### Sheep In Western Canada

#### New Government Map Shows Large Sheep Ranches

A map showing the location of all large sheep ranches in Western Canada has been prepared by the Department of the Interior at the instance of the Economics Branch of the Dominion Department of Agriculture to assist sheep ranchers, farmers, and feeders to make contacts with one another. The map may be obtained from G. S. Herlinger, secretary of the South-Western Saskatchewan Wool Growers' Association, Maple Creek, Sask.; N. McLeod, secretary of the Southern Alberta Sheep Breeders' Assn., Ltd., 1221 2nd Ave., Lethbridge, Alta.; Miss M. E. Lauder, secretary, British Columbia Sheep Breeders' Association, Kamloops, B.C., or the Economics Branch, Department of Agriculture, Ottawa.

The purpose of the map is to improve the contact between ranchers and those wishing to feed lambs or purchase sheep. It is pointed out that there is a considerable movement of such livestock from ranches to farms particularly during the fall of the year for feeding purposes. Lambs are often contracted to farmers and breeding ewes are sometimes sold to farmers on a poundage of lamb basis. Copies of standard contracts used for such purposes may also be obtained upon request from those mentioned above.

In the case of ewes purchased under contract it is the custom for the rancher to deal directly with the farmer. This makes it desirable that the farmer be located within driving distance or a maximum of approximately fifty miles from the rancher with whom he is dealing.

The location and address of sheep ranchers is given on the map and those interested in the feeding of lambs or in the purchase of ewes under contract or otherwise may correspond directly with ranchers or with the secretaries of the associations mentioned.

The preparation of this map is one of the results of an economic survey carried out by the Economics Branch of the Dominion Department of Agriculture with the co-operation of the Dominion Experimental Farms and Livestock Branches.

### Room For Improvement

#### More Readable Type For Printing Bible Is Suggested

Church officials in convention at New Plymouth in New Zealand considered the manner in which the Bible is arranged and printed, and their decision was that changes should be made. The suggestions of brighter covers, a better arrangement of the reading matter and perhaps the use of some illustrations. Such things may be all right, but we were taken with the suggestion that the Bible should be printed in a more readable type. The New Zealand folk were certain that the Book was too hard for people to read because it was in nearly all cases printed in such small type.

That protest should be sustained says the Stratford Beacon-Herald. The idea of the small print may be to keep the book within reasonable size, thus making it easy to carry. But what is the use in making it easy to carry and at the same time making it hard to read? The average Bible is not nearly as easy to read as newspapers, and the reason is that newspapers pay a great deal of attention to securing the most readable type faces. We hope the church folk in New Zealand do something about it.

### Aid For Sheep Breeders

#### Rambouillet Rams To Be Imported From Montana

In order to improve the type of flock by the introduction of new blood, southern Alberta sheep breeders will receive Dominion aid in the purchase of Rambouillet rams in Montana for their local herds, according to N. T. Macleod, secretary of the Alberta Sheep Breeders' Association. The Southern Alberta and Southern Saskatchewan Sheep Growers' Associations will share in the purchase and while the federal assistance will not meet the requirements of the breeders, it will be substantial. On a future occasion, when a new ewe division of the Ottawa government has been in Montana and has spotted the rams from which it is expected W. S. Benson, field man for the Canadian Co-operative Wool Growers' Association, will make the final choice. The Dominion government will pay Mr. Benson's expenses and the freight from Montana to the various destinations in Alberta and Saskatchewan. The purchases are expected to total two car-loads.

There's always the bright side. You can't poke the same finger into an electric fan twice.

Lifeguards to the number of 4,000 are on duty in England during the summer. More than 1,500 are women.

The Republic of Panama, divided by the narrow canal zone strip, is one of the least known of the nations on the Western Hemisphere, and yet practically every school child knows of the Panama Canal, the great American-built, American-owned waterway connecting the Atlantic with the Pacific.

Panama the Republic is one of the infants of the New World, both in area and age, yet its history dates back to the time of the earliest European explorers of America.

Columbus cruised in Panamanian bays on his fourth voyage in search of a short cut from Europe to Cathay. Balboa crossed this lean neck of land to discover the Pacific ocean. Later it enjoyed high rank among the leading Spanish colonies because rich men on the West coast of South America preferred to cross it rather than to "double" Cape Horn on their way to Europe.

Panama's real advancement, however, dates from 1903, when the country changed from a department of Colombia to an independent state.

In 1902 the United States by treaty offered to pay the government of Colombia \$10,000,000 in gold for concessions which would make possible the building of a canal across Panama and provided for an annuity of \$250,000, beginning nine days after the ratification of this agreement. It further provided that the territory comprising the canal zone should be neutral and under the guarantee of both countries.

The Colombian senate voted against the acceptance of the treaty, and as a result, on November 4, 1903, Panama declared itself an independent republic. The United States troops prevented the land of Colombian forces at Colon and Acapeculo, and the new republic was formally recognized by the United States on November 18, 1903. The treaty with the new republic was concluded a week later.

Under the treaty the Republic of Panama granted to the United States a zone of land ten miles in width and extending five miles on either side of the centre of the canal, with the proviso that the cities of Panama and Colon should not be included within the grant. The compensation granted to Panama for this concession was the same as provided in the former offer to Colombia. The area measures 32,358 square miles, with a population of half a million.

Actual work on the canal was started in 1904, but little progress was made until 1906, when the work was turned over to the engineer corps of the regular army under the direction of General G. W. Goethals, under whose efficient administration the gigantic work was brought to a successful issue in August, 1914.

Shaped like a crawling caterpillar, with its head touching Costa Rica on the north and its tail reaching southward to the forested mountains of Colombia, Panama, equal in area to the State of Ohio, is known to few people beyond its borders because its fame is overshadowed by the importance to the world of the Panama Canal and the Panama Canal Zone.

Panama City, visited by nearly every passenger who disembarks at Colon, from the frequent Mauretania cruises, the largest to call at Colon, is on the Pacific side of the canal. They find Panama City a shoppers' paradise. The bay is still a fisherman's paradise. Panama, in the native Indian tongue, means "abundant fish."

When Morgan, the pirate, sacked old Panama City in 1671 more than 175 pack animals were needed to carry away the gold, silver and other loot previously looted from the natives of the Spaniards.

The old city was founded in 1516 and is the oldest town on the mainland of America. Tourists never fail to visit the old cathedral, the tower of which still stands although the greater part of the church's walls have fallen in. A tree is growing where the centre aisle used to be.

### Canadian Farmers Benefit

#### Rising Bacon Prices In Britain Have Been Help

The ten per cent of Canadian bacon that is sold in England sets the price of hogs in Canada. Rising bacon prices in Britain have enormously benefited Canadian farmers. On some future occasion, when a low world price is reducing Canadian farmers' income on some agricultural product, let us remember that the value of export trade cannot be measured by the returns on a single product in a single year but must be measured by its returns over a longer period.

### Well Defined

An English bishop has said that he is not sure what a beauty parlor is. A beauty parlor is a place where a woman is quite sure what to look her worst for several hours on any day in which she wants to look her best for a few minutes.

Lightning conductors will be fitted on historic trees in Czechoslovakia.

## New Fall Coats and Millinery

Stunning Fall Coats \$22.50 to \$39.50

With Wolf, Skunk, Squirrel or Seal in rich trimmings; pure wool cloths; two season guaranteed linings; interlinings and linings to the waist. Colors: Browns, Blues, Green, Wine and Black.

Others Priced from \$12.50 to \$19.50

### Smart Dresses

In the difficult class. Don't admit, even to yourself, that the new fall styles aren't becoming in your size. Wait till you've tried on one of the crepes—see the slender look of the clever lines and details; the flattery of the trimmings. Open work, with net inserts. Appliques of satin. Touches of gleaming metallic Fall tones. Sizes 18 1-2 to 28 1-2.

\$9.50 to \$19.50

### HOLD UP ALBERTA BANK

On Friday morning last, the branch of the Bank of Commerce at Hairy Hill, on the Edmonton-Willingdon line, was held up and robbed by three men who have so far escaped apprehension. Just after opening the bank on Friday morning, three men entered and held up the manager and two assistants. They then pulled down the blinds, locked the door and proceeded to open the vault out. So quietly was the robbery effected that citizens of the town were unaware of the holdup until sometime afterwards, when the bank staff managed to get home from their bonds and give the alarm. The robbers cut the telephone wires from the bank. The police were soon on the scene, however, and are

making a determined hunt for the desperadoes. The amount stolen was in the neighborhood of nine thousand dollars.

### AT THE AVALON

Thursday, Friday, Saturday  
DOUBLE FEATURE

"Convention City"—a comedy starring Joan Blondell, Dick Powell and A. Menjou. Also "Kennel Murder Case," starring William Powell and Mary Astor.  
Monday, Tuesday and Wednesday, October 1, 2 and 3. The first House McGarrin Fight picture. Also "American Madmen," starring Walter Houston. This is a real picture. If we get a good crowd on this fight pic-

ture we will book the last McGarrin bout.

## Pratt's Garage

Where You Buy With Confidence

## The Objective!

Alberta Pool Elevators are put to prove that a co-operative grain handling concern can be an instrument of usefulness to all grain growers and a successful business group as well.

Every grain grower in the vicinity of an Alberta Pool Elevator is invited to aid in this effort to perpetuate in Alberta, by Alberta farmers, for the good of all, a strong, grower-controlled, co-operative elevator organization.

This can be done with advantage by delivering grain in wagon lots or car lots to
